- Support the measurement and optimization of the user experience across OPAP digital assets, through specific methodologies & reporting tools.

We are seeking students to cover Internship for the Technology & Digital functions in our UX/UI Team.

- Good understanding of networking and TCP/IP concepts
- Systems programming skills (Microsoft Windows, GNU/Linux, Android, MacOS or iOS)
- Good understanding of at least two operating systems
- x86 or x86_64 Assembly skills
- Background knowledge in software security (Academic or Professional)
- Familiarity with ARM or MIPS Assembly
- Familiarity with Ruby, Visual Basic, C#, or C++ development
- Code auditing skills
- Vulnerability research skills
- Good understanding of networking and TCP/IP concepts.
- Systems programming skills
- Good understanding of at least two operating systems
- C and Python development skills
- Familiarity with IDA Pro or Ghidra
- Reverse engineering

Also, any of the following (not strictly required) skills will be

- Good understanding of networking and TCP/IP concepts
- Systems programming skills
- Good understanding of at least two operating systems
- C and Python development skills
- Familiarity with ARM or MIPS Assembly
- Familiarity with Ruby, Visual Basic, C#, or C++ development
- Code auditing skills
- Vulnerability research skills
- Good understanding of networking and TCP/IP concepts.
- Systems programming skills
- Good understanding of at least two operating systems
- C and Python development skills
- Familiarity with ARM or MIPS Assembly
- Familiarity with Ruby, Visual Basic, C#, or C++ development
- Code auditing skills
- Vulnerability research skills
- Good understanding of networking and TCP/IP concepts.
- Systems programming skills
- Good understanding of at least two operating systems
- C and Python development skills
- Familiarity with ARM or MIPS Assembly
- Familiarity with Ruby, Visual Basic, C#, or C++ development
- Code auditing skills
- Vulnerability research skills
- Good understanding of networking and TCP/IP concepts.
- Systems programming skills
- Good understanding of at least two operating systems
- C and Python development skills
- Familiarity with ARM or MIPS Assembly
- Familiarity with Ruby, Visual Basic, C#, or C++ development
- Code auditing skills
- Vulnerability research skills
- Good understanding of networking and TCP/IP concepts.
- Systems programming skills
- Good understanding of at least two operating systems
- C and Python development skills
- Familiarity with ARM or MIPS Assembly
- Familiarity with Ruby, Visual Basic, C#, or C++ development
- Code auditing skills
- Vulnerability research skills
- Good understanding of networking and TCP/IP concepts.
- Systems programming skills
- Good understanding of at least two operating systems
- C and Python development skills
- Familiarity with ARM or MIPS Assembly
- Familiarity with Ruby, Visual Basic, C#, or C++ development
- Code auditing skills
- Vulnerability research skills
- Good understanding of networking and TCP/IP concepts.
- Systems programming skills
